

POWER ELECTRONICS CAPACITORS CML1135FAMJ3Z RATING, GENERAL CHARACTERISTICS

12/05/2017

Rated capacitance	Cn	13,5	μF
Capacitance tolerance	CII	±5	μ1 %
Rated rms voltage	Urms	500	Vac
Rated AC voltage	Un	705	Vac
Rated DC voltage	Udc	850	Vdc
Recurrent peak voltage	Us	1200	Vdc
Rated RMS current	Irms	45	A
Maximum dV/dt	dV/dt	350	Λ V/μs
Repetitive peak current(max. peak current î-EN 61071)		2363	V/μS A
Non repetitive peak current(max. surge current îs-EN 61071)	Ipkr Inkn	2505 3544	A
Equivalent series resistance	Ipkn ESD(typ)	3344 4	A mΩ
•	ESR(typ)		1112.2
Tangent of the loss angle tanδ (1kHz) (typ)	$tg\delta(typ)$	0,0003	-
Tangent of the loss angle tanδ (1kHz) (max)	tgδ(max)	0,0005	-
TEST DATA			
A.C. Test voltage between terminals (≥1,5 Urms, 10s)	Utt	750	Vac
A.C. Test voltage between terminals and case(3s)	Utc	3500	Vac
ENVIRONMENTAL CHARACTERISTICS			
	t°	85	°C
Maximum operating temperature	t° t°	85 -40	°C °C
Maximum operating temperature Lowest operating temperature			_
Maximum operating temperature Lowest operating temperature Maximum storage temperature	t°	-40	°C
Maximum operating temperature Lowest operating temperature Maximum storage temperature Lowest storage temperature	t° t°	-40 85	°C °C
Maximum operating temperature Lowest operating temperature Maximum storage temperature Lowest storage temperature RELIABILITY	t° t°	-40 85 -55	°C °C
Maximum operating temperature Lowest operating temperature Maximum storage temperature Lowest storage temperature RELIABILITY Max. expected number failures for 10 ⁹ components hours	t° t° t°	-40 85 -55	°C °C
Maximum operating temperature Lowest operating temperature Maximum storage temperature Lowest storage temperature RELIABILITY	t° t° t°	-40 85 -55	°C °C
Maximum operating temperature Lowest operating temperature Maximum storage temperature Lowest storage temperature RELIABILITY Max. expected number failures for 10 ⁹ components hours	t° t° t°	-40 85 -55	°C °C
Maximum operating temperature Lowest operating temperature Maximum storage temperature Lowest storage temperature RELIABILITY Max. expected number failures for 10 ⁹ components hours Expected life	t° t° t°	-40 85 -55	°C °C
Maximum operating temperature Lowest operating temperature Maximum storage temperature Lowest storage temperature RELIABILITY Max. expected number failures for 10 ⁹ components hours Expected life MECHANICAL CHARACTERISTICS	t° t° t° FIT	-40 85 -55 300 ≥100000	°C °C °C hours
Maximum operating temperature Lowest operating temperature Maximum storage temperature Lowest storage temperature RELIABILITY Max. expected number failures for 10° components hours Expected life MECHANICAL CHARACTERISTICS Dimensions	t° t° t° FIT	-40 85 -55 300 ≥100000	°C °C °C hours
Maximum operating temperature Lowest operating temperature Maximum storage temperature Lowest storage temperature RELIABILITY Max. expected number failures for 10 ⁹ components hours Expected life MECHANICAL CHARACTERISTICS Dimensions Case material	t° t° t° FIT Ln	-40 85 -55 300 ≥100000 75x140 Aluminium M12	°C °C °C hours
Maximum operating temperature Lowest operating temperature Maximum storage temperature Lowest storage temperature RELIABILITY Max. expected number failures for 10 ⁹ components hours Expected life MECHANICAL CHARACTERISTICS Dimensions Case material Fixing	t° t° t° FIT Ln DXH Stud	-40 85 -55 300 ≥100000 75x140 Aluminium M12	°C °C °C hours
Maximum operating temperature Lowest operating temperature Maximum storage temperature Lowest storage temperature RELIABILITY Max. expected number failures for 10 ⁹ components hours Expected life MECHANICAL CHARACTERISTICS Dimensions Case material Fixing Plastic plate/lid	t° t° t° FIT Ln DXH Stud	-40 85 -55 300 ≥100000 75x140 Aluminium M12 low smoke	°C °C °C hours
