Remarks:

1) Rated current is present for frequency 50 Hz. Please contact with us if capacitors intended for another frequencies.

Total capacitors rated current, including harmonics currents for filtering capacitors with terminal block must be not exceeded 45 A.

2) Capacitors dimensions: D - capacitor diameter, H - capacitor high (without terminals).

Capacitors with diameters D = 75...100 mm produce with stermlal blocks 3 x 16 mm².

Capacitors with diameter D = 120 mm produce with screw terminals 3 x M10 (IP00).

3) Capacitance, voltage and frequency standard value, other values on request by small batches.

For more information please contact us.

4) On request capacitors at 690 VAC are available.
